Mobile: +91 9611536971

OBJECTIVE

Seeking a challenging position in a leading IT organization, where I can utilize my skills to further work towards personal and professional development to contribute towards the prosperity of organization.

TECHNICAL SKILLS

Programming:

- Python Basics.
- Handling data sets using NumPy and Pandas.

Web Technologies: HTML, CSS, JavaScript

Database Knowledge:

- **SQL level 1** : DDL, DML, TCL and DCL statements, Constraints, Grouping, Sub-queries and Co-related Sub-queries, Functions, Joins.

Frame work:

- **Django**

Data Visualization:

- Data Visualization Using **Microsoft Power BI**: Power query, Power View, M- Function, Dax Function, Data Connectivity

Others:

- Basic knowledge on **UNIX** commands.
- Proficient in **MS Office** and **MS Excel**.
- **Tools**: Oracle SQL Developer
- **IDE**: (Pycharm, Google Colab)

TRAINING

Trained @ Prime Intuit, BENGALURU

PERIOD: July 2023 to Till Date

- Computational Thinking
- Programing using python
- Developing Frontend using HTML/CSS/JS
- Database query using SQL
- Developing and deploying web application using Django
- Learning to use database system, manage large files & run reports to analyze data.
- Learning to use NumPy and Pandas for data manipulation/analytics.
- Prepare and cleansing data
- Version Management using (Git and Git hub)

CAPSTONE PROJECTS

Railway Enquiry System web application using Django framework:

The Indian railway system has provided us with an API from railapi.com through which we can gather all the information about the status of the train, PNR number, etc in real-time. The idea of this project is to create a web app using the railapi that will give us all the information about the user queries related to the railway.

HR Analytics Dashboard

The HR analytics Contains information about employees within a company and various attributes related to their employment, performance, and reasons for attrition. Analyzing the overall attrition rate in the company can provide understanding of how many employees leave and information about attrition.

Roles and responsibilities include identifying the key performance indicators (KPIs) and metrics needed, Design and develop dashboard interface using Power BI Desktop, Creating Data visualizations, such as charts, graphs and tables, Implementing interactive elements and filters for user interaction.
